**DETAILED ACTION**

***Restriction/Election***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 (in part), 15-37 (in part), 40-49 (in part), 54-65 (in part), drawn to compounds where **W** in Formula **IV** is 1,3-diazepines (sum of o and p is 3) and 1,3-diazecines (sum of o and p is four), classified in class 540, subclass various.
  - II. Claims 1-12 (in part), 15-37 (in part), 40-49 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is 1,3-diazines (sum of o and p = 2), classified in class 540, subclass various.
  - III. Claims 1-38 (in part), 39-49 (in part), 51 and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is morpholine fused to pyridine, classified in class 544, subclass various.
  - IV. Claims 1-12 (in part), 15-37 (in part), 40-49 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is 1,3-diazines (sum of o and p = 2), classified in class 544, subclass various.
  - V. Claims 1-49, 50 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is naphthyridines (pyridine fused to piperidine), classified in class 546, subclass various.
  - VI. Claims 1-12 (in part), 15- 23 (in part), 26-37 (in part), 40-49 (in part), 54-65 (in part), drawn to compounds where **W** in Formula **IV** is pyridine fused to

azoles and pyridine fused to diazoles, classified in classes 546, subclass various.

- VII. Claims 1-50 (in part), 52 and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is unfused pyridines, classified in classes 546, subclass various.
- VIII. Claims 1-13 (in part), 15-23 (in part), 26-37 (in part), 40-49 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is benzimidazole ( $Z = C$  and  $Y = \text{nitrogen}$ ) and imidazole ( $Y = N$ ), classified in class 548, subclass various.
- IX. Claims 1-12 (in part), 15-23 (in part), 26-37 (in part), 40-49 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is benzopyrrole i.e. indole ( $Z = \text{carbon}$  and  $Y = \text{carbon}$ ) and pyrrole ( $Y = \text{carbon}$ ),
- X. Claims 1-12 (in part), 15-23 (in part), 26-37 (in part), 40-49 (in part) and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is 1,3-thiazines, classified in class 548, subclass various.
- XI. Claims 1-13 (in part), 15-23 (in part), 26-37 (in part), 40-49 (in part), 53 and 54-65 (in part), drawn to compounds where **W** in Formula **IV** is guanidine derivative (non-heterocyclic), classified in class 548, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1624

Groups I-XI are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of **W** in Formula **IV** do not belong to the same recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others. Each compound in Groups I-IX has different ring size, different heteroatoms in the ring and have different chemical core structures. Group XI is different from Groups I-X, since it is drawn to guanidine derivatives (non-heterocyclic). Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structure equivalents of each other.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1624

A telephone call was made to Mr. John Covert on April 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
